

Automated Deblister System

Take the manual labor out of deblistering medication blister strips with the RoboPharma Automated Deblister System.

- Saves time, energy & steps
- Tracks total number of pills per session
- Accommodates almost any size blister strip, with tablets or capsules
- Deblisters up to 20 blister strips per minute (depending on operator)
- Simple to use, program & clean
- Prevents waste & saves resources

Simple Operation

1. Adjust the input channel.
2. Enter the number of pills per blister strip.
3. Feed in the strip one at a time.
4. Pills are collected in the lower container.
5. Process one or multiple blister strips of the same medication.
